

APS

Air Production & Service, Inc

Packaged Air Solutions

Engineered, manufactured, and delivered to your facilities — *exactly to specification.*

Portable and adaptable, our *Packaged Air Solutions* operate in any environment while maximizing savings, and greatly reducing onsite installation time.

1

MAPS

A fully portable solution — *Modular Air Production Systems* offer fast install and reduced overall costs. Engineered off-site to spec — this solution is delivered ready to put your compressed air in production.

2

CAPS

Canopy Air Production Systems offer that same savings in time on-site and overall costs while delivering optimized outdoor protection and full access capabilities.

3

Containers

This complete, self-contained system requires a minimal footprint and is dependable, and a cost-effective solution for optimized air production.

4

Skids

Our *Skid Assembly Solutions* can easily be added to an existing mechanical room and are an ideal rental system solution.
